

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

Computer Vision – 21CSE454T

UNIT 2: SHAPES AND REGIONS | SESSION 7: HANDLING OCCLUSION

SLO 2: Develop and apply methods to robustly detect and analyze objects despite occlusion.

STRATEGY BUILDER SOLUTIONS

Technique	Correct Match / Purpose
Feature-based recognition	A (Detect objects using visible features)
Multi-view analysis	B (Analyze objects from different viewpoints)
Machine learning models	C (Predict missing parts of objects)
Shape completion	D (Reconstruct partially hidden shapes)

Write the correct matches:

- Feature-based recognition → **A**
- Multi-view analysis → **B**
- Machine learning models → **C**
- Shape completion → **D**

QUICK THINKING TASK SOLUTION

Complete the sentence:

Even if part of an object is hidden, computer vision systems can still detect it by analyzing the **visible** features of the object.
